

MBA Elite 2026

Data Interpretation & Logical Reasoning

DPP: 1

Tables

Directions (1-5) Read the following passage and answer the given questions.

The following tables represent the number of students in each branch of the respective college.

Institute	HR	Finance	Marketing	Operations
MDI	170	200	350	120
IMT	180	150	250	180
NMIMS	250	200	200	135
XLRI	350	100	120	85

Q1 What is the average number of HR students in these 4 colleges? (If in decimal, then write the integral part only)?

- (A) 117 (B) 435
(C) 226 (D) 237

Q2 The ratio of male and female students of MDI and IMT in the Finance department is 2 : 3 and 3 : 7 respectively. Find the ratio of MDI's Finance Male to the IMT's Finance Females.

- (A) 16 : 19 (B) 21 : 25
(C) 16 : 21 (D) 16 : 25

Q3 Find the average number of students in each department of MDI?

- (A) 210 (B) 220
(C) 200 (D) 230

Q4 The ratio of males and females in each department of each college is 2 : 3. Find the ratio of the number of females in the HR department of all 4 colleges to the number of males in the marketing department of all 4 colleges.

- (A) 287 : 189 (B) 285 : 184
(C) 287 : 184 (D) 285 : 187

Q5 The number of students available in MDI's HR department is what percent more than the number of students in XLRI's operations department?

- (A) 80% (B) 60%
(C) 75% (D) 100%

Directions (6-10) Read the following passage and answer the given questions.

The following table represents the expenditure of the company (in lakhs) per annum over the given years.

Note: There is no other expenditure other than the mentioned.

Year	Transport	Salaries	Bonus	Taxes	Interest on Loans
2005	56	150	9	81	11.4
2006	62	155	12	85	15.4
2007	67	170	8	90	16.7
2008	65	169	9	95	18.8
2009	70	185	11	82	19.6

Q6 What is the average amount spent by a company on Bonus from 2005 to 2009?

- (A) 9.1 lakhs (B) 9.8 lakhs
(C) 8.9 lakhs (D) 7.8 lakhs

Q7 The total expenditure of the company in 2006 is what percent of the total expenditure in 2009?

- (A) 89.6% (B) 85%
(C) 86.4% (D) 85.5%

Q8 If the total expenditure of the company in 2008 is 60% of the total revenue. Then the revenue in 2008 will be:

- (A) 594.67 lakhs (B) 593.67 lakhs
(C) 591.67 lakhs (D) 597.67 lakhs

Q9 What is the difference in the expenditure of the company in 2005 to 2008?

- (A) 47.4 Lakhs (B) 48.4 Lakhs
(C) 49.4 Lakhs (D) 50.4 Lakhs

Q10 What is the ratio of the total amount of expenditure on taxes in 2006 to the amount of expenditure on bonus in 2009?

- (A) 85 : 18 (B) 65 : 11
(C) 75 : 11 (D) 85 : 11

Directions (11-15) Read the following passage and answer the given questions.

The following table represents the sales of the 4 brands (in units) in the respective months.

Company	January	February	March	April	May
Maggi	250	240	300	360	400
Parle	361	400	420	380	450
Ashirwad	270	300	350	370	360
Oreo	440	480	400	360	380

Q11 What is the average sales of Maggi in these five months?

- (A) 300 (B) 310
(C) 320 (D) 330

Q12 What is the difference between the average sales of Parle and Oreo in these five months?

(If in decimal, then write the integral part only)

- (A) 10 (B) 15
(C) 20 (D) 9

Q13 The cost price of each unit of Oreo and Parle is 20 and 10. What will be the difference in the total cost of these two companies in these five months?

- (A) 21990 (B) 21099
(C) 21890 (D) 21090

Q14 What is the average of these 4 brands in March? (If in decimal, then write the integral part only.)

- (A) 360 (B) 365
(C) 367 (D) 380

Q15 The sales in April are what percent more/less than sales in May?

- (A) 7.5% less (B) 7.5% more
(C) 8.5% less (D) 8.5% more

Directions (16-20) Read the following passage and answer the given questions.

The table below provides information on the population of 6 different states in India.

State	Number of populations (in lakhs)	Number of Women per 1000 men	Graduates (%)	Employability (%)
Uttar Pradesh	510	856	61	40
Madhya Pradesh	725	915	68	48
West Bengal	620	988	78	56
Karnataka	316	890	75	58
Maharashtra	458	920	81	62
Andhra Pradesh	245	945	65	42

Note: -

- All the data provided are above the age of 18.
- Every person is either male or female.
- Employability = $\frac{\text{Number of people employed}}{\text{Total people}} \times 100$

Q16 Which of the states has the most employability?

- (A) Uttar Pradesh
(B) West Bengal
(C) Madhya Pradesh
(D) Andhra Pradesh

Q17 What is the number of female graduates (in lakhs) in Karnataka, if 42% of the graduates in that state are males?

- (A) 112.45 (B) 123.89
(C) 137.46 (D) 141.14

Q18 What is the difference (approx.) in lakhs between the number of females in Maharashtra and Andhra Pradesh?

- (A) 100.42 (B) 112.84
(C) 221.56 (D) None of these

Q19 If 70% of the graduates in West Bengal are employed, what is the number of non-graduates who are employed (in lakhs)?

- (A) 9.05 (B) 8.68
(C) 11.24 (D) 15.65

Q20 If 60% of the males are graduates in Madhya Pradesh, then what percent of the females in the state are graduates?

- (A) 81.45 (B) 61.24
(C) 76.75 (D) 70.86

Directions (21-25) Read the following passage and answer the given questions.

The below table shows percentage of boys in different schools of city Xeric. All the students are either of Boys or Girls.

School	Boys (%)
Alaska	52
Biraj	42
Cimor	44
Dither	38
Enuma	61
Faron	54

Q21 If each of the schools have 550 students, then what is the total number of female students in Biraj and Faron?

Q22 If the ratio of the total students in school Alaska and Enuma is 13:6, then the number of girl students in Alaska is what percent more/less than that of Enuma?

- (A) 140% (B) 98.78%
(C) 166.67% (D) 126.28%

Q23 If 616 girls are in the school Cimor, then what is the difference in the number of boys and girls in that school?

Q24 Considering the number of students in school Dither and Faron are 23% and 31% respectively of the sum of all the students of these six schools, then what is the relation between number of girls' students of both the schools?

- (A) Dither > Faron
(B) Dither = Faron
(C) Dither < Faron
(D) Can not be determined

Q25 If the number of boys in school Biraj is the same as the number of girls in school Enuma, then what is the ratio between total number of students of school Biraj to that of Enuma?

- (A) 7:8 (B) 6:7
(C) 11:13 (D) 13:14

Directions (26-30) Read the following passage and answer the given questions.

In the table below, the Percentage of marks obtained by six students in five different subjects in class X.

Subject	Accounts	English	Hindi	Mathematics	Pol. Science
Max Marks	50	100	80	100	70
Minnie	70	70	80	64	50
Navi	65	80	75	71	65
Gulshan	90	67	95	82	80
Jatin	75	86	100	68	75
Honey	50	92	70	92	70
Neeraj	65	79	85	91	80

Q26 What is the average of the marks obtained by Minnie?

- (A) 57.3 (B) 53.6
(C) 54 (D) 58.2

Q27 What are the percentage marks obtained by Honey in class X?

- (A) 78.5% (B) 81.5%
(C) 72.6% (D) 84.5%

Q28 Who scored the lowest marks in the class?

- (A) Navi (B) Jatin
(C) Neeraj (D) None of these.

Q29 What is the average of all marks in Pol. Science Subject?

- (A) 49 (B) 52

(C) 48

(D) 44

Q30 What is the ratio of total marks scored in English to Hindi?

(A) 237 : 219

(B) 201 : 202

(C) 237 : 202

(D) 201 : 219

Hints & Solutions

Note: scan the QR code to watch video solution

Q1. Text Solution:

$$\begin{aligned}\text{Required Average} &= \frac{170+180+250+350}{4} \\ &= 237.5 \\ &= 237 \text{ students}\end{aligned}$$

Video Solution:

Q2. Text Solution:

$$\begin{aligned}\text{MDI} &= \text{Male} : \text{Female} = 2 : 3 \\ \text{Number of males in MDI's Finance} &= \frac{2}{5} \times 200 = 80 \\ \text{Number of Females in IMT's Finance} &= \frac{7}{10} \times 150 = 105 \\ \text{Required Ratio} &= 80 : 105 \\ &= 16 : 21.\end{aligned}$$

Video Solution:

Q3. Text Solution:

$$\begin{aligned}\text{Required Average} &= \frac{170+200+350+120}{4} \\ &= 210\end{aligned}$$

Video Solution:

Q4. Text Solution:

As the ratio of male and female candidates in each department of each college is 2 : 3.

So the number of females in MDI's HR department will be $\frac{3}{5} \times 170 = 102$

Similarly, IMT = 108

NMIMS = 150

XLRI = 210

Total females in the HR department of all 4 colleges = $102 + 108 + 150 + 210 = 570$.

Similarly, the total number of males in the Marketing department of all 4 colleges = $140 + 100 + 80 + 48 = 368$

$$\begin{aligned}\text{Required Ratio} &= 570 : 368 \\ &= 285 : 184\end{aligned}$$

Video Solution:

Q5. Text Solution:

$$\begin{aligned}\text{Required percentage} &= \frac{170-85}{85} \times 100 \\ &= 100\%\end{aligned}$$

Video Solution:

Q6. Text Solution:

$$\begin{aligned}\text{Average} &= \frac{9+12+8+9+11}{5} \\ &= 9.8 \text{ lakhs}\end{aligned}$$

Video Solution:

PW Website

Q7. Text Solution:

Total expenditure of the company in 2006 = 62 + 155 + 12 + 85 + 15.4
= 329.4 lakhs

Total expenditure of the company in 2009 = 70 + 185 + 11 + 82 + 19.6
= 367.6 Lakhs

Required percentage = $\frac{329.4}{367.6} \times 100$
= 89.6 %

Video Solution:**Q8. Text Solution:**

Total expenditure of company in 2008 = 356.8
Total revenue $\times 60\%$ = 356.8
Total revenue = 594.67 lakhs

Video Solution:**Q9. Text Solution:**

Total amount of expenditure in 2005 = 56 + 150 + 9 + 81 + 11.4
= 307.4 Lakhs

Total amount of expenditure in 2008 = 356.8 Lakhs

Required difference = 356.8 - 307.4
= 49.4 Lakhs.

Video Solution:**Q10. Text Solution:**

The total amount of expenditure on taxes in 2006 = 85

The amount of expenditure on bonuses in 2009 = 11

Required ratio = 85 : 11

Video Solution:**Q11. Text Solution:**

Required Average = $\frac{250 + 240 + 300 + 360 + 400}{5}$
= 310

Video Solution:**Q12. Text Solution:**

Average sale of Parle = $\frac{361 + 400 + 420 + 380 + 450}{5}$
= 402.2

Average sale of Oreo = $\frac{440 + 480 + 400 + 360 + 380}{5}$
= 412

Required difference = 412 - 402.2
= 9.8

= 9 (integral part only)

Video Solution:**Q13. Text Solution:**

Total cost of Oreo in these five months,
= $(440 + 480 + 400 + 360 + 380) \times 20$
= 2060×20
= 41200

Total cost of Parle in these five months,
 $= (361 + 400 + 420 + 380 + 450) \times 10$
 $= 20110$
 Required difference $= 41200 - 20110$
 $= 21090$

Video Solution:

Q14. Text Solution:

Required average $= \frac{300 + 420 + 350 + 400}{4}$
 $= 367.5$ units
 $= 367$ units.

Video Solution:

Q15. Text Solution:

Total sales in April $= 360 + 380 + 370 + 360 = 1470$
 Total sales in May $= 1590$
 Required % $= \frac{1590 - 1470}{1590} \times 100$
 $= 7.5\%$ less

Video Solution:

Q16. Text Solution:

The number of employed for,
 Uttar Pradesh $= 510 \times \frac{40}{100} = 204$ lakhs
 Madhya Pradesh $= 725 \times \frac{48}{100} = 348$ lakhs
 West Bengal $= 620 \times \frac{56}{100} = 347.2$ lakhs
 Karnataka $= 316 \times \frac{58}{100} = 183.28$ lakhs

Maharashtra $= 458 \times \frac{62}{100} = 283.96$ lakhs
 Andhra Pradesh $= 245 \times \frac{42}{100} = 102.9$ lakhs
 Madhya Pradesh has the highest employability.

Video Solution:

Q17. Text Solution:

The total graduates in Karnataka $= 316 \times \frac{75}{100} = 237$
 Given that 42% of the graduates in the state are males,
 So, the female graduates in that state are $= 58\%$ of the total graduates $= 237 \times \frac{58}{100} = 137.46$ Lakhs.

Video Solution:

Q18. Text Solution:

For the state of Maharashtra, there is 920 females per 1000 of males
 So, 920 females are in each of $920 + 1000 = 1920$ populations
 the number of females in Maharashtra $= 458 \times \frac{920}{1920} = 219.46$ Lakhs
 Similarly, for Andhra Pradesh, 945 females are there for each of the 1945 populations.
 the number of females in Andhra Pradesh $= 245 \times \frac{945}{1945} = 119.04$ Lakhs
 The difference $= 219.46 - 119.04 = 100.42$ Lakhs

Video Solution:

**Q19. Text Solution:**

The number of graduates in West Bengal =

$$620 \times \frac{78}{100} = 483.6 \text{ Lakhs}$$

The number of employed in West Bengal =

$$620 \times \frac{56}{100} = 347.2 \text{ Lakhs}$$

As given, 70% of the graduates in West Bengal are employed,

Then the number of employed graduates in West Bengal is = $483.6 \times \frac{70}{100} = 338.52 \text{ Lakhs}$

So, the number of non-graduates who are employed = $347.2 - 338.52 = 8.68 \text{ Lakhs}$

Video Solution:**Q20. Text Solution:**

For Madhya Pradesh,

There are 915 females for every 1000 males.

The total males in Madhya Pradesh =

$$\frac{725}{915+1000} \times 1000 = 378.59 \text{ lakhs}$$

The total females in Madhya Pradesh = $725 - 378.59 = 346.41 \text{ lakhs}$

The total graduates = $725 \times \frac{68}{100} = 493 \text{ lakhs}$

Given, that 60% of the males are graduates.

the male graduates = $378.89 \times \frac{60}{100} = 227.15 \text{ lakhs}$

The female graduates = total graduates – male graduates

$$= 493 - 227.15$$

$$= 265.85 \text{ lakh}$$

Hence, % of the females who are graduates in the state are = $\frac{265.85}{346.41} \times 100 = 76.75\%$

Video Solution:**Q21. Text Solution:**

The female students in a school = Total students – number of Boys students

Number of boys students in Biraj = $\frac{42}{100} \times 550 = 231$

Number of boys students in Faron = $\frac{54}{100} \times 550 = 297$

in Biraj number of female students = $550 - 231 = 319$

in Faron number of female students = $550 - 297 = 253$

The total number of female students in Biraj and Faron = $319 + 253 = 572$

Video Solution:**Q22. Text Solution:**

Let, the total students in school in Alaska = $13x$

The percentage of girl's students in Alaska = 48% ($13x$)

the total students in school Enuma = $6x$

The percentage of girl's students in Enuma = 39% ($6x$)

The ratio between the number of girls students of Alaska and Enuma = $\frac{48\%(13x)}{39\%(6x)} = \frac{8x}{3x} = 8x:3x$

Then the number of girls students of Alaska is more than that of Enuma.

So, the required percentage (more) =

$$\left(\frac{8x-3x}{3x}\right)100 = \left(\frac{5x}{3x}\right)100 = 166.67\%$$

Video Solution:

**Q23. Text Solution:**

The boys' students in the school Cimor = 44% (of the total)

The girls' students in the school Cimor = $(100 - 44)\%$ of the total students = 56% (of the total students)

The girls' students in the school Cimor = 616 = 56% (of the total students)

The difference in boys' and girls' students = $56 - 44 = 12\%$ (of the total students) = $\frac{616}{56} \times 12 = 132$

Video Solution:**Q24. Text Solution:**

Let the total number of students in all the schools = x

the number of students in school Dither = $x \left(\frac{23}{100} \right)$

So, the number of girls' students in school Dither = $x \left(\frac{23}{100} \right) \left(\frac{62}{100} \right) = 0.1426x$

the number of students in school Faron = $x \left(\frac{31}{100} \right)$

So, the number of girls' students in school Faron = $x \left(\frac{31}{100} \right) \left(\frac{46}{100} \right) = 0.1426x$

Hence, the relation between the number of girls' students in both the schools are equal.

Video Solution:**Q25. Text Solution:**

Let, the total students in Biraj = x

the total students in Enuma = y

the number of boys in school Biraj = 42% (x)

the number of girls in school Enuma = 39% (y)

Given, that the number of boys in school Biraj is the same as the girls in school Enuma

So, $42\% (x) = 39\% (y)$

$$\frac{x}{y} = \frac{39}{42}$$

$$\frac{x}{y} = \frac{13}{14}$$

The ratio between the total students of school Biraj to that of Enuma = 13:14

Video Solution:**Q26. Text Solution:**

Subject	Accounts	English	Hindi	Mathematics	Pol. Science	Total
Max Marks	50	100	80	100	70	400
